Ivan EPOV

Computer Science Engineering Student · ENSEEIHT (INP Toulouse)

+33 7 89 54 81 64 | ivan.epov.pro@gmail.com

PROFILE

Computer science engineering student with a solid mathematical background (two years of a B.Sc. in Mathematics) and hands-on project experience in software, embedded systems and drones, complemented by an internship in system and network administration. Ranked 3rd nationally in the Pass'Ingénieur entrance exam. Motivated to build a career in computer science, networks and telecommunications.

EDUCATION

ENSEEIHT (INP Toulouse) *Sept. 2026 – July 2029 · In progress*

Master of Science in Engineering, Computer Science and Computer Engineering

- Computer Science (SN) department: core computer science, networking and telecommunications
- Admitted through the nationwide Pass'Ingénieur competitive exam, ranked 3rd nationally (a selective track for university undergraduates)

Polytech Tours *Sept. 2024 – June 2026 · Completed*

Integrated Preparatory Cycle (PeiP), Mathematics

- Two-year integrated programme combining a Mathematics degree with engineering coursework and team projects; Computer Science and Electronics specialization in semester 3
- **Modular Utility Drone** (Year 2, semester-long pair project with report and defense): designed a drone end to end (sizing, components, assembly) with a universal mounting system for swappable modules (cargo, winch, crop spraying). *Betaflight, iNav, electronics*
- **"Chef de gare" video game** (Year 1, semester-long pair project with report and defense): developed a real-time railway logistics and train routing simulation. *Godot Engine, GDScript*
- **Self-driving car** (Year 2): implemented AI-based lane tracking in a simulated environment. *Python*
- **Smart home** (Year 2): built a sensor-driven control system for HVAC, lighting and shutters. *Arduino*
- **Handheld weather station** (Year 2): displayed real-time environmental data on an LCD screen. *MicroPython*
- **Data-collecting robot** (Year 1): programmed obstacle avoidance and environmental data logging. *MicroPython*

University of Tours *Sept. 2024 – June 2026 · 120 ECTS*

Licence (B.Sc. equivalent), Years 1 and 2, Mathematics

- Followed in parallel with Polytech Tours (about 4 days a week at the university, 1 day at the engineering school), building a rigorous foundation in pure mathematics
- **Algebra:** diagonalization, pre-Hilbert and Euclidean spaces · **Analysis:** power, function and Fourier series
- **Multivariable calculus** · **Probability:** combinatorics, discrete and continuous random variables, standard distributions

Jacques Monod High School, Lescar *Sept. 2021 – July 2024*

French Baccalauréat (general track)

- Specialized in Mathematics (including advanced maths option), Physics-Chemistry and Computer Science

PROFESSIONAL EXPERIENCE

System and Network Administration Intern *June – July 2026 · 4 weeks*

IPREM (CNRS–UPPA research laboratory), Pau · Internship as part of Polytech Tours

- Gained hands-on grounding in system and network administration within a public research laboratory
- Configured and deployed new workstations and migrated machines from Windows 10 to Windows 11
- Troubleshot hardware and software issues and carried out network cabling and patching

Private Mathematics Tutor *2022 – Present*

Pau and Toulouse

- Helped students of various levels with their maths homework, developing clear explanation and teaching skills

SKILLS

Programming	Python (including object-oriented programming), GDScript, C, Ada
Tools	Git, Godot Engine
Soft skills	Project management, teamwork
Languages	French (native) · Russian (native) · English (B2/C1)

CERTIFICATIONS & INTERESTS

Certifications: Pix digital skills (632 pts) · Driving licence (category B)
Interests: Chess (concentration, problem solving, anticipation) · Computer science
